

## TECHNICAL

- Corrosion resistant aluminium, metal housing.
- Polyester electrostatic powder coating.
- Diffuser with high light transmittance.
- High light color rendering.
- Low energy consumption, high efficiency. Long life.
- Shock and vibration resistant construction.

Different architectural dimensions require different luminaire proportions. These light building elements with a mounting height of 6000 to 10000 millimetres and light emission on one side or on two sides are a great solution for lighting applications in small to medium-sized public areas: for the illumination of small squares, entrance areas in front of buildings and connecting paths.

## LIGHT SOURCE FEATURES

*Lumen (lm):* 2X7000

*Kelvin (K):* 4000-6000

*Power (W)* 2X55

*Beam Angle (β):*

*CRI: Ra>85*

*IP:* 66

*Control Type:* On - Off

*Size (mm):* 150X300X8000

## Other features

- Fastners grade: SS304 ZFC
- Durable silicone rubber gasket
- Surge protection 10kV
- High tempered glass

*Components: Chip and driver Philips*
